

Management of COVID -19

While we serve our society by providing an essential service i.e. power generation to the society in these difficult times, we are also committed to curb the outbreak of COVID -19. In this regard, Vector Green, being a responsible corporate citizen, has taken several measures to ensure the health and safety of its employees, nearby community and all stakeholder at large. The company has issued health advisory on COVID -19 across the organization and has also organized awareness sessions among all of its employees to educate their families also on necessary measures they should take during this pandemic. We have taken a prompt decision to extend work from home facility for all employees, who are not necessarily required to operate from office. Since we need to run our plants to perform a significant duty assigned to us being a utility company, our times manning the power plants are fully equipped to handle the pandemic in their vicinities. They have been armed with required knowledge about COVID-19 and its spread, protective measures that they should take, guidelines to handle any suspected case of COVID-19 and other safety measures. Additionally, the following measures have also being undertaken such as temperature screening for all the employees and visitors, sanitation of offices and workplaces twice a day, health assessment data collection of all employees and visitors, dedicated COVID-19 task force assigned to monitor the situation and help employees during the pandemic, protocols are defined for visitors and employees, suspended travel of all employees during the pandemic, availability of personal hygiene PPEs as Masks, Liquid Hand wash / Toilet soaps, Napkins / Paper towels, alcohol based hand sanitizer across project sites and offices, and circulation of emergency contact nos. including task force, Govt. helpline, quarantine facilities, testing facilities and hospitals across the organization. Daily reporting specific to COVID -19 is also being done by the respective functions.
