

## **ADANI AGRI FRESH LIMITED**

The company has handed-over available oxygen cylinders to the government and is also discussing if its Nitrogen generator could be used for Oxygen generation. Through the Adani Foundation, the company is organizing camps to spread awareness about Covid-19 preventive measures and distributing free masks and medicines, in the catchment area of its operations. It has provided its migrant labour, in-house residential facilities in the premises with round the clock availability of fresh water and sanitised washrooms to curb unnecessary movements of labour outside the premises. The company is buying the agri produce at the farmgate at good prices, saving the farmer from long distance travel to the mandis and also securing payments at the time of financial insecurities. Strict preventive measures are being followed at all sites of the company to avoid spread the Covid-19. Adoption of measures such as sanitization of all vehicles, body temperature checks, social distancing and SOPs to prevent overcrowding of vehicles, etc. have helped the company to maintain zero cases throughout the operational period till date.
