

# AFCONS INFRASTRUCTURE

Afcons, through Maharashtra State Road Development Corporation, contributed towards the installation of a 20,000-litre capacity Liquid Medical Oxygen Storage Tank at the Civil District Hospital in Nanded. This will provide oxygen support to the district hospital and other smaller hospitals in the district. The company has airlifted 50 five-litre oxygen concentrators from the US, which have been extended to Afcons' sites in areas where oxygen and hospital beds are not available. The company has set up quarantine facilities at its locations for its staff and workers and made arrangements for oxygen, beds, doctors, and medicines.

Vaccination for employees and contractual workers and their families is being carried out. In addition, the company has arranged for a corporate floater option, doubling the basic sum insured, at no extra premium to the employees.
