

CYIENT FOUNDATION

The Foundation, with a team of its 100 volunteers is working on multiple fronts to provide COVID relief. It is organizing blood and plasma donation drives at Cyient's offices in Madhapur and Manikonda, Hyderabad. At a time when people are struggling to find hospital beds, oxygen, medicines, and plasma to save lives, a dedicated team is validating information. It is in discussions with various hospitals and COVID -19 facilities to convert Cyient's cafeteria into isolation centers. Shortly, the Foundation will be launching a donation drive to collect food grains, vegetables, and other food material for the underprivileged who are finding it challenging to earn daily wages in these times. In addition, the Foundation is looking at training 1000+ bedside care attendants for patients who cannot leave home. This is being done through Cyient Urban Micro Skills Centre and HealthSignz Care Centre. Stitching of 3-layer masks and body suits from Cyient Urban Micro Skill Centres and Sensitization of community near Cyient adopted schools, digital centers and skill centres are ongoing initiatives.
