

SPICE HEALTH

SpiceHealth disrupted the Real-Time Polymerase Chain Reaction (RT-PCR) testing space by offering tests in mobile laboratories at INR 499, as opposed to the then existing rate of INR 2400 in Delhi (November 2020), helping bring down Covid-19 testing cost dramatically across the country. SpiceHealth was also the first to introduce the innovative concept of mobile testing laboratories that could be placed in remote areas, in containment zones, in villages where access to hospitals and medical facilities remains a challenge. Since its launch in November 2020, SpiceHealth has conducted more than 2.2 million RT-PCR tests and has spread its operations across five states - Delhi, Haryana, Maharashtra, Kerala, Uttarakhand.
