

# TECH MAHINDRA FOUNDATION

Tech Mahindra Foundation (TMF) sensed that the COVID-19 pandemic would make the social disparities wider as people from vulnerable communities suffer from hunger and have little access to safety gear. Tech Mahindra Foundation is serving the nation through its 359 COVID Relief projects across 14 states (Andhra Pradesh, Assam, Bihar, Jammu & Kashmir, Jharkhand, Karnataka, Maharashtra, New Delhi NCR, Odisha, Punjab, Tamil Nadu, Telangana, Uttar Pradesh and West Bengal) and has touched the lives of more than 21 Lakh people.

The Foundation is setting about 50 oxygen plants across the country at Government / Charity Hospitals. The Foundation has trained frontline workers like sanitization workers, social workers, nurses and Anganwadi workers on COVID Swayam Suraksha. TMF also upskilled nurses through simulation-based training on ventilators for critical management of COVID-19 patients with comorbidities. It has launched a "Mind@Ease" platform for Counselling Services, with a focus on Mental Health & Wellbeing, in association with Tech M's Makers' Lab.
