

THE TINPLATE COMPANY OF INDIA LIMITED

The company hospital has started a 27 bed COVID-19 treatment facility with central oxygen supply, for mild and moderate cases. In addition, 12 beds with central oxygen supply and 5 beds with oxygen concentrators are being operated for suspected cases in the emergency area of the hospital. The company has vacated the GT hostel to house the nurses / para medical staff and conservancy services personnel who are deputed at the COVID-19 facility of the hospital and need to stay isolated. Free food and all other facilities are being provided for their comfortable stay. Additional doctors / nurses / para-medical staff and conservancy personnel have also been recruited for the COVID-19 facility. The previous capacity of 12 bulk oxygen cylinders for providing oxygen through the manifold system has now been augmented into 77 cylinders to meet the high demand. The company has set up a vaccination centre within hospital premises for the benefit of the citizens of Jamshedpur including its employees and family members.
