

YARA FERTILISERS INDIA PRIVATE LIMITED

Yara Fertilisers India Pvt Ltd is making available three portable oxygen generators of capacity 45 litre per minute to Government Hospitals in Sambhal district in Uttar Pradesh. Another bigger capacity oxygen generator plant of 500 LPM capacity of PSA technology, which is equivalent to 900 kg/day, will be installed in Sambhal District Hospital by 1st week of July 2021 to meet the additional demand.

The company has setup a 100-bed quarantine center for immigrants returning to their villages and the suspected cases are being tested. Yara has also extended support to government health agencies / hospital and police personnel by distributing health kits comprising hand gloves, sanitizer, face mask, soap and liquid antiseptic. As part of its community interventions, the company has taken various measures like distribution of cotton face masks, raw food packets, sanitizer, creating regular awareness about COVID-19, decontamination using bleaching powder and other disinfectants in the villages around its plant at Babrala, Uttar Pradesh.
